

South Dakota: Expanding Exports and Supporting Jobs through Trade Agreements

For almost 40 years, Congress has enacted Trade Promotion Authority (TPA) type laws to help guide both Democratic and Republican Presidents in pursuing trade agreements that support U.S. jobs, eliminate barriers to U.S. exports, and set rules to level the playing field for U.S. companies, farmers, and workers. In these laws, Congress has set high-standard objectives and priorities for U.S. trade negotiators and established a process for consulting with Congress and the public.

The United States currently has free trade agreements with 20 partners which support 47 percent of total goods exports. The regional trade agreements currently under negotiation – Trans-Pacific Partnership (TPP) and Transatlantic Trade and Investment Partnership (TTIP) – accounted for 62 percent of U.S. goods exports in 2014, and supported an estimated 4.2 million U.S. jobs in 2013. Over fifty countries are negotiating a separate agreement focused on opening markets to trade in services, which would create significant new opportunities for U.S. services firms. TPA will allow these agreements to become a reality, spurring economic growth in the United States and our trading partners.

Exports Support Jobs for American Workers

Total exports from South Dakota helped contribute to the record-setting value of U.S. goods and services exports in 2014, which reached \$2.35 trillion. Nationally, U.S. jobs supported by exports reached an estimated 11.3 million in 2013, up 1.6 million since 2009. U.S. goods exports to current FTA partners supported an estimated 3.2 million jobs nationally. In 2013, goods exports from the state of South Dakota supported an estimated 10 thousand U.S. jobs.

Exports Sustain Hundreds of South Dakota Businesses

A total of 970 companies exported from South Dakota locations in 2012. Of those, 731 (75.4 percent) were small and medium-sized enterprises with fewer than 500 employees. Small and medium-sized firms generated over one-third (36.3 percent) of South Dakota's total exports of merchandise in 2012.

Trade Agreements

The United States currently has free trade agreements in force with 20 countries, which accounted for \$1.2 billion (74 percent) of South Dakota's exports in 2014. During the past 10 years (2005-2014), exports from South Dakota to these markets grew by 110 percent, with NAFTA, Korea, Australia, Israel, and Colombia showing the largest dollar growth during this period.

South Dakota Depends on World Markets

South Dakota's exports of merchandise in 2014 totaled \$1.6 billion. The state's largest market was Canada. South Dakota posted merchandise exports of \$715 million to Canada in 2014, representing 44.9 percent of the state's total merchandise exports. Canada was followed by Mexico (\$344 million), Belgium (\$51 million), Saudi Arabia (\$47 million), and Japan (\$40 million).

South Dakota exporters take advantage of U.S. trade agreements

Bubble size represents relative value of South Dakota's exports to each country

The state's largest merchandise export category was Food & Kindred Products, which accounted for \$552 million of South Dakota's total merchandise exports in 2014. Other top merchandise exports were Machinery, Except Electrical (\$330 million); Transportation Equipment (\$163 million); Computer & Electronic Products (\$139 million); and Beverages & Tobacco Products (\$64 million).

South Dakota's Metropolitan Exports

In 2013, merchandise exports from South Dakota's metropolitan areas included: Sioux Falls (\$433 million) and Rapid City (\$30 million).

Future Trade Agreements will Benefit South Dakota's Exporters

Trans-Pacific Partnership (TPP)

TPP negotiations with Australia, Brunei, Canada, Chile, Japan, Malaysia, Mexico, New Zealand, Peru, Singapore, and Vietnam center on creating a high-standard, regional agreement that opens new markets and knits together existing U.S. trade agreements in the Asia-Pacific region by addressing new and emerging issues. The United States exported \$727.0 billion in goods to all TPP markets in 2014 (45 percent of total U.S. exports). In 2013, U.S. goods exports to all TPP markets supported an estimated 3.0 million U.S. jobs.

South Dakota exported \$1.2 billion annually in goods to all TPP markets (2012-2014 average). During this period, 74 percent of South Dakota's total goods exports went to the entire TPP region.

South Dakota's exports could benefit from new market access as a result of Brunei, Japan, Malaysia, New Zealand, and Vietnam eliminating their tariffs as part of TPP. Efforts under TPP to address unnecessary barriers to trade, increase transparency and certainty for businesses, and promote the rule of law throughout the region could also benefit South Dakota's exporters. TPP could further promote regional integration by providing companies the ability to access supply chains that span four continents and a dozen countries.

South Dakota's top industrial goods exports to Brunei, Japan, Malaysia, New Zealand, and Vietnam include:

Consumer goods: Currently, tariffs on consumer goods in these TPP markets range up to 85 percent. TPP trade facilitation provisions could benefit consumer goods exports by streamlining and speeding up border crossings.

Minerals and fuels: The tariffs on minerals and fuels in these TPP markets currently go as high as 30 percent.

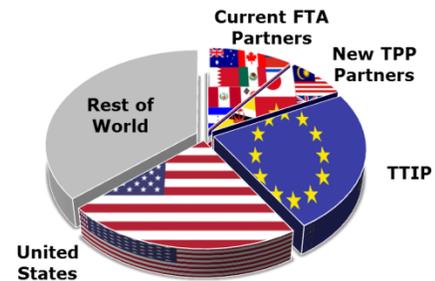

Automotive products: Currently, tariffs on automotive products in these TPP markets range up to 83 percent.

Transatlantic Trade and Investment Partnership (TTIP)

TTIP will be an ambitious, comprehensive, and high-standard trade and investment agreement that offers significant benefits for U.S. companies and workers through eliminating existing trade barriers and better enabling U.S. companies and workers to compete. TTIP will provide significant new opportunities for U.S. industry, as approximately one-fifth of all U.S. goods and services exports go to the European Union (EU). In 2013, U.S. goods and services exports to the EU supported an estimated 2.5 million U.S. jobs.

South Dakota exported \$114 million annually in goods to the EU (2012-2014 average). The EU's tariff elimination as part of TTIP would provide new market access that could benefit South Dakota's exports.

With TTIP & TPP, the United States & its trade agreements partners would account for 64% of global GDP

Exports from South Dakota could also benefit from efforts in TTIP to achieve new market access commitments in services and investment, improve the regulatory environment, and establish global best practices.

South Dakota's top industrial goods exports to the EU include:

Machinery products: Currently, the EU's tariffs on machinery products range up to 9.7 percent.

Information and communication technologies: The EU's tariffs on information and communications technologies (ICT) currently go as high as 14 percent. ICT exports could also benefit from TTIP provisions that will address technical regulations and standards that unnecessarily restrict trade.

Consumer goods: Currently, the EU's tariffs on consumer goods range up to 15 percent.

Trade in Services Agreement (TiSA)

A trade agreement focused exclusively on services, TiSA will encompass state-of-the-art trade rules aimed at promoting fair and open competition across a broad spectrum of service sectors. Presently there are more than 50 participants in the TiSA negotiations, representing 75 percent of world trade in services and a majority of the \$44 trillion global services market.

The United States is the world's largest and most competitive provider of services. U.S. services exports in 2014 were \$710 billion, accounting for about 30 percent of total U.S. exports, and generating a trade surplus of \$231.8 billion. Promoting the expansion of services trade globally will pay dividends for the United States, with every \$1 billion in services exports supporting an estimated 5,900 U.S. jobs in 2013. Service industries employ workers throughout the country, and approximately three out of every four American workers nationwide.

An ambitious, high-standard international services agreement presents a tremendous opportunity to remove a range of barriers that face U.S. service exports, and thus boost U.S. economic growth and support additional jobs.
