Transatlantic Trade and Investment Partnership (T-TIP) Opportunities for Vermont

T-TIP stands to be an ambitious, comprehensive, and high-standard trade and investment agreement that offers significant benefits for U.S. companies and workers through eliminating existing trade barriers and better enabling U.S. companies and workers to compete. T-TIP will provide significant new opportunities for U.S. industry, as approximately one-fifth of all U.S. goods and services exports go to the European Union (EU). In 2013, every billion dollars of U.S. exports supported 5,590 jobs. In that same year, U.S. goods and services exports to the EU supported an estimated 2.5 million U.S. jobs.

Key Opportunities for Vermont’s Industries

**Information and Communication Technologies (ICT)**

The ICT sector accounted for 42 percent of Vermont’s total exports to the EU between 2012 and 2014. During that same period ICT product exports to the EU from Vermont averaged $145 million annually. The EU currently has tariffs on ICT products as high as 14 percent. Vermont companies would likely benefit from reduced tariffs in this sector as a result of the agreement. ICT exports could also benefit from T-TIP provisions that will address technical regulations and standards that unnecessarily restrict trade.

**High-tech Instruments**

The high-tech instruments sector accounted for 11 percent of Vermont’s total exports to the EU between 2012 and 2014. During that same period high-tech instrument exports to the EU from Vermont averaged $40 million annually. The EU currently has tariffs on high-tech instruments as high as 6.7 percent. Vermont companies would likely benefit from reduced tariffs in this sector as a result of the agreement.

**Machinery**

The machinery sector accounted for 11 percent of Vermont’s total exports to the EU between 2012 and 2014. During that same period machinery product exports to the EU from Vermont averaged $38 million annually. The EU currently has tariffs on machinery products as high as 9.7 percent. Vermont companies would likely benefit from reduced tariffs in this sector as a result of the agreement.

Exports Sustain Thousands of Vermont Businesses including SMEs

A total of 1,270 companies exported from Vermont locations in 2013. Of those, 1,093 (86.1 percent) were small and medium-sized enterprises with fewer than 500 employees. Small and medium-sized firms generated nearly one-sixth (16.2 percent) of Vermont’s total exports of merchandise in 2013.

Vermont exported $366 million annually in goods to the EU (2012-2014 average). Vermont’s goods exports to the EU increased by 4 percent from 2012 to 2014.

The EU’s tariff elimination as part of T-TIP would provide new market access that could benefit Vermont’s exports. Exports from Vermont could also benefit from efforts in T-TIP to achieve new market access commitments in services and investment, improve the regulatory environment, and establish global best practices.

How Past FTAs Have Benefitted Vermont

The United States currently has free trade agreements in force with 20 countries, which accounted for $2.1 billion (57 percent) of Vermont’s exports in 2014. During the past 10 years (2005-2014), exports from Vermont to Australia, Israel, CAFTA-DR, Oman, and Colombia showed the largest dollar growth.

In Their Own Words: T-TIP Comments

**Telecommunications Industry Association (TIA)**

“We see significant potential for a TTIP to increase transatlantic trade of telecommunications goods and services. As the two largest telecommunications markets in the world, the benefits of a comprehensive agreement will likely have a significant commercial benefit to the United States and Europe.”

**National Electrical Manufacturers Association (NEMA)**

“Our member companies manufacture a diverse set of products including power transmission and distribution equipment, lighting systems, factory automation and control systems, and medical diagnostic imaging systems. Saving time and money not having to pay import duties could provide for notable efficiencies and re-programming of company resources into more productive activities.”

**The American Farm Bureau Federation**

“The American Farm Bureau Federation, a U.S. general farm organization, supports efforts to increase agricultural trade flows and remove several major impediments to this flow that currently exist between the United States and the European Union.”
