

# China Initiates?Review of its Antidumping Duty Measure on n-Propanol from the United States

## China Initiates Review of its Antidumping Duty Measure on n-Propanol from the United States

On November 17, 2025, China’s Trade Remedy Investigations Bureau (TRIB) [initiated](#) an expiry review of its antidumping (AD) duty measure on imports of n-Propanol (NPA) from the United States. China’s AD measure on NPA has been in place since November 18, 2020. The AD duties currently in place for U.S. producers/exporters range from 254.4% to 267.4%.

### What is an expiry review?

An expiry review is also known as a sunset review, and its purpose is to determine whether the revocation of the AD measure would be likely to lead to the continuation or recurrence of dumping or unfair subsidization and material injury to the domestic industry. The measure may only be extended beyond five years, counting from the date on which a measure was first instituted or the most recently completed expiry review, if both conditions are met.

### How can I participate?

U.S. companies involved in the production, sale, or distribution of the subject goods should register as interested parties as soon as possible. Registration is the first step in protecting your rights in a foreign trade remedy proceeding. Doing so allows you to access the case records and submit information and comments, ensuring that your views are considered. To register as an interested party, please follow the instructions listed in the [Initiation Notice](#).

| KEY DATES                                |                                      |
|------------------------------------------|--------------------------------------|
| Period of Investigation                  | July 1, 2024, through June 30, 2025? |
| Registration Deadline                    | December 7, 2025                     |
| Initial Questionnaire Response Deadline* | January 24, 2026                     |
| Preliminary Determination*               | TBA                                  |
| Final Determination*                     | November 18, 2026                    |
