REPORT OF THE EXECUTIVE SECRETARY

During the 2006 fiscal year, the Foreign-Trade Zones (FTZ) Board issued 67 formal orders. The decisions included approvals for six new general-purpose zones and 18 new subzones. Authority was also granted for the expansion of 20 existing general-purpose zones. Other actions involved the granting of authority for revisions to zone plans, six expansions of the scope of manufacturing activity, as well as nine approvals for new manufacturing activity in zones.¹

There were 163 FTZ projects fully active during the year, with subzones in operation in more than 100 of them. The number of facilities using subzone status during the year was 257.

The combined value of shipments into general-purpose zones and subzones totaled \$491 billion, compared with \$410 billion the previous year (Table below and Appendix D). General-purpose sites received \$73 billion in merchandise. Total shipments received at subzone sites amounted to \$419 billion. Some 85 percent of zone activity took place at subzone facilities, which is consistent with the pattern of the past 15 years.²

¹ Appendix A contains a summary of each Board Order. Zone authority for manufacturing/processing activity was granted on a restricted basis in 14 cases, and activation/time limits were adopted in another 16 cases. The main products covered by restrictions included crude oil, pigments, and textiles.

² Appendices B and C contain figures on shipments into and out of general-purpose zones and subzones. Appendix D contains comparative statistics for the past five years. The figures regarding merchandise, employment, products, and other activity in zones represent the latest statistical data available based on reports from zone grantees. Some are still under review. Adjustments normally amount to less than 1 percent of aggregate shipments.

³ The dollar values in this report and appendices are rounded numbers. Calculations were performed before rounding using the complete numbers.

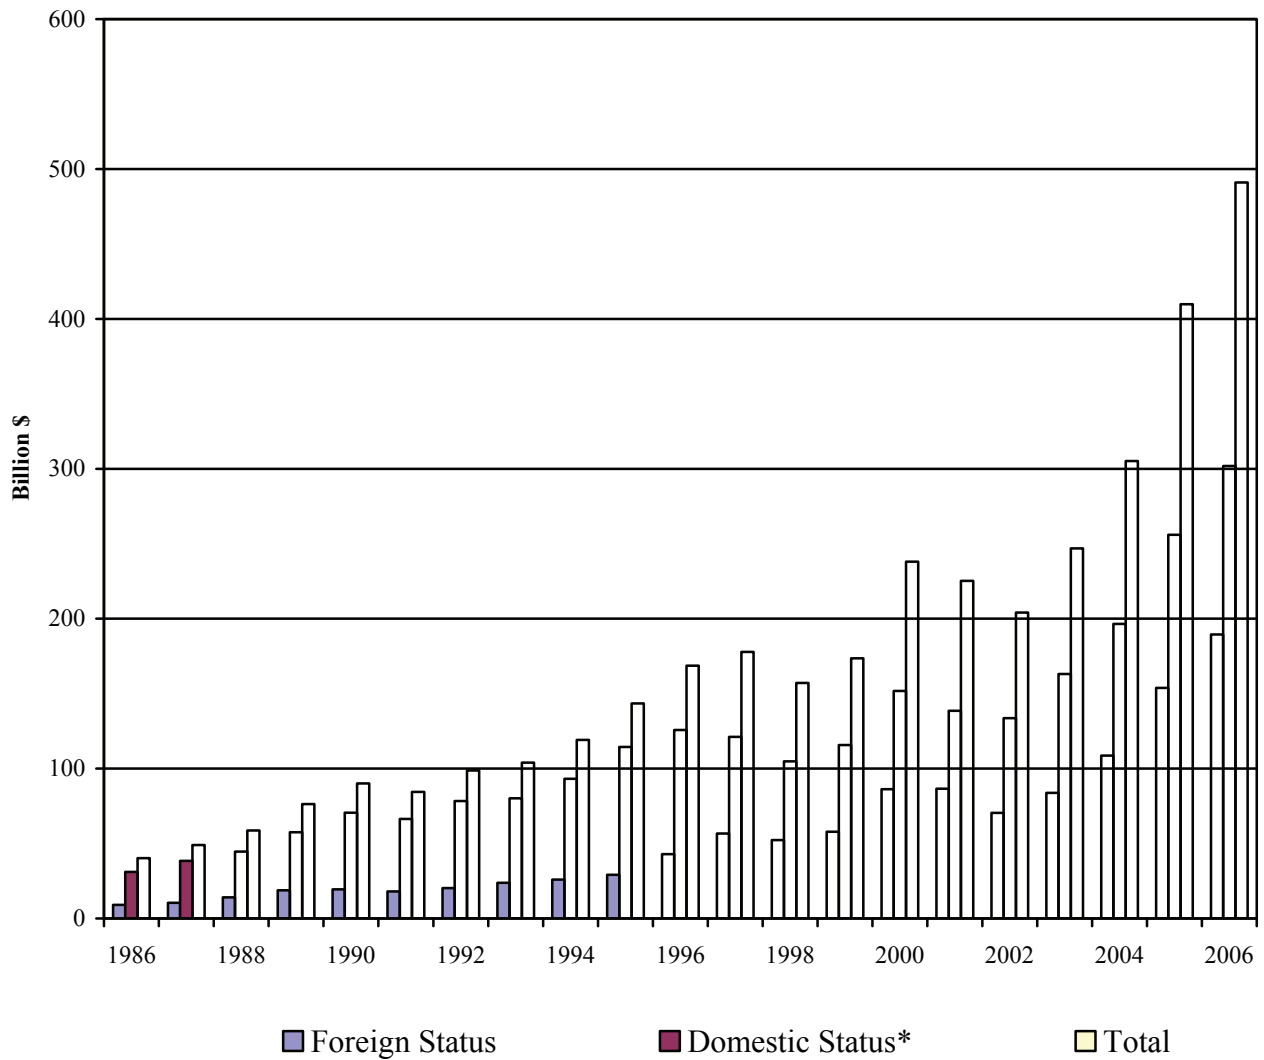

Exports (shipments to foreign countries) from facilities operating under FTZ procedures amounted to over \$30 billion (Figure 2). The export figures do not include certain indirect exports involving FTZ merchandise that undergoes further processing in the United States at non-FTZ sites prior to export.

Approximately 350,000 persons were employed at some 3,500 firms that operated under FTZ procedures during the year. The main foreign-origin products received at zones are listed in Appendix E.

Industries that continued to account for most zone manufacturing activity included the oil refining, automotive, pharmaceutical, and electronic product sectors. About 61 percent of the shipments received at zones involved domestic status merchandise. The level of domestic status inputs used by FTZ operations indicates that FTZ activity tends to involve domestic operations that combine foreign inputs with significant domestic inputs.

The Board received and filed 60 formal applications during the fiscal year. These proposals requested authority for three new general-purpose zones and 22 subzones, as well as authorization for expansion, reorganization, new manufacturing, and other changes at existing zone projects. The FTZ Board's notices on the applications can be found on the FTZ Board's website (www.trade.gov/ftz) under "Notices and Board Orders." In addition, some 82 cases were processed under the Board's less formal administrative procedures (Appendix F). The latter cases involved routine, non-controversial changes to zone projects, such as boundary modifications and scope decisions.

APPENDIX H:
GLOSSARY OF TERMS, ABBREVIATIONS, AND ACRONYMS

Admit, Admission are the CBP terms describing the shipment of merchandise *into* U.S. foreign-trade zones under CBP supervision (19 C.F.R. 146.1).

Board means the Foreign-Trade Zones Board, which consists of the Secretary of the U.S. Department of Commerce (chair) and the Secretary of the U.S. Treasury, or their designated alternates.

CBP is the abbreviation of United States Customs and Border Protection.

CFR is the abbreviation for the Code of Federal Regulations.

Customs means United States Customs and Border Protection (CBP) of the U.S. Department of Homeland Security.

Domestic origin/duty paid describes zone merchandise that is mainly of domestic origin, but also includes foreign-origin merchandise on which customs entry and duty payments have been made prior to admission to the zone site.

Domestic status (also, **domestic status inputs**) is used synonymously with **domestic-origin/duty-paid** (see above). Domestic status is the customs status (19 C.F.R. § 146.43) for domestic-origin and duty-paid foreign-origin zone merchandise.

Entry for consumption is the term that describes the general CBP process of filing the appropriate customs documents that allows merchandise to be brought into the commerce of the United States (19 C.F.R. 141). With respect to foreign-trade zones, this process occurs when merchandise is shipped from the zone into U.S. commerce.

EXP refers to an expansion of a general-purpose zone or subzone.

Exports describes the category of merchandise that is forwarded from zone sites to destinations in foreign countries.

EXT refers to an extension of a time limit placed on zone sites or activity.

Foreign-trade zone is a restricted-access site, in or adjacent to a CBP port of entry, operated pursuant to public utility principles under the sponsorship of a corporation granted authority by the Board pursuant to the Foreign-Trade Zones Act (19 U.S.C. 81a-81u) and regulations (15 C.F.R. Part 400), and under supervision of U.S. Customs and Border Protection.

Foreign status (also, **foreign status inputs**) describes zone merchandise admitted to a zone site under CBP supervision that is normally of foreign origin. Such merchandise is admitted to zone sites without being subject to formal customs entry procedures and payment of duties, unless and until the foreign merchandise enters customs territory for domestic consumption. Foreign status merchandise is further categorized by CBP as either **non-privileged foreign** or **privileged foreign**.

Forwarded (also, **shipped**) describes the category of merchandise that is shipped from or forwarded from zone sites after release by CBP. This category includes merchandise that is forwarded to destinations in the U.S. market as well as merchandise that is exported (i.e., forwarded to markets in foreign countries).

FR is the abbreviation for the *Federal Register*.

FTZ means a foreign-trade zone.

FY is the abbreviation for fiscal year. The fiscal year for the federal government begins on October 1 and ends September 30 of the following year.

Grant of authority is a document issued by the Board that authorizes a zone grantee to establish, operate, and maintain a zone project or a subzone, subject to limitations and conditions specified in the Board's regulations (19 C.F.R. Part 400 and 19 C.F.R. Part 146). The authority to establish a zone includes the authority to operate and the responsibility to maintain it.

Manufacturing means activity involving the substantial transformation of a foreign article resulting in a new and different article having a different name, character, and use.

Merchandise received involves merchandise received into activated FTZ space under FTZ procedures by foreign-trade zones and subzones. It includes foreign status merchandise and domestic status merchandise.

MFG refers to manufacturing activity within a general-purpose zone or subzone.

Non-privileged foreign status is one of two customs categories of **foreign status** merchandise (See 19 C.F.R. 146.42). Such merchandise is evaluated based on its condition at the time it is shipped from the zone to the U.S. market and entered for consumption by CBP.

NPF refers to non-privileged foreign status.

NZ is the abbreviation for a new zone.

PF refers to privileged foreign status.

Port of entry means a port of entry in the United States, as defined by part 101 of the CBP regulations (19 C.F.R. Part 101), or a user-fee airport authorized under 19 U.S.C. 58b and listed in part 122 of the regulations of the CBP (19 C.F.R. Part 122).

Privileged foreign status is one of two customs categories of **foreign status** merchandise (See 19 C.F.R. 146.41). Such merchandise maintains its status based on its condition when it was admitted to the zone. Thus, when the merchandise is shipped from the zone to the U.S. market and entered for consumption by CBP, it is evaluated based on the time-of-admission condition even though it might have undergone a transformation in the zone.

Processing, when referring to zone activity, means any activity involving a change in condition of merchandise, other than manufacturing, that results in a change in the customs classification of an article or in its eligibility for entry for consumption.

Subzones are a special-purpose type of ancillary zone authorized by the Board, through grantees of public zones, for operations by individual firms that cannot be accommodated within an existing zone, when it can be demonstrated that the activity will result in a significant public benefit and is in the public interest.

SZ is the abbreviation for subzone.

USC is the abbreviation for the United States Code.

Zone means a **foreign-trade zone** (see above) established under the provisions of the FTZ Act and regulations. The term also includes subzones, unless the context indicates otherwise.

Zone grantee is the corporate recipient of a grant of authority for a zone project. The term “grantee” means “zone grantee” unless otherwise indicated.

Zone operator is a corporation, partnership, or person that operates a zone or subzone under the terms of an agreement with the zone grantee or an intermediary entity, with the concurrence of the CBP port director.

Zone project means the zone plan, including all of the zone and subzone sites that the Board authorizes under a single grantee.
