

72nd ANNUAL REPORT of the

Foreign-

Trade

Zones

Board

to the

Congress

OF THE UNITED STATES

Foreign-trade zones are secure areas under supervision of U.S. Customs and Border Protection (CBP) that are considered outside the customs territory of the United States for the purposes of duty payment. Located in or near customs ports of entry, they are the U.S. version of what are known internationally as free trade zones. Authority for establishing these facilities is granted by the Foreign-Trade Zones Board under the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a-81u), and the Board's regulations (15 C.F.R. Part 400). The Executive Secretariat of the Board is located within the Import Administration of the U.S. Department of Commerce, Washington, D.C. 20230.

Foreign and domestic merchandise may, subject to FTZ Board and CBP regulations, be moved into zones for operations not otherwise prohibited by law involving storage, exhibition, assembly, manufacturing, and processing. All zone activity is subject to public interest review, and all manufacturing and processing activity requires a case-by-case review. Under zone procedures, the usual formal customs entry procedure and payment of duties are not required on the foreign merchandise unless and until it enters customs territory for domestic consumption, in which case the importer normally has a choice of paying duties either on the original foreign materials or the finished product. Domestic goods moved into a zone for export are considered exported upon entering the zone for purposes of excise tax rebates and drawback. FTZ sites and activities remain within the jurisdiction of federal, state and local governments and agencies.

Zones are sponsored by qualified public or public-type corporations, which may themselves operate the facilities or contract for their operations with public or private firms. The operations are conducted on a public utility basis, with published rates. A typical general-purpose zone provides leasable storage/distribution space to users in general warehouse-type buildings with access to all modes of transportation. Most zone projects include an industrial park site with lots on which zone users can construct their own facilities. Subzones are usually private plant sites authorized by the Board through zone grantees for operations that cannot be accommodated within an existing general-purpose zone.

The regulations of the Foreign-Trade Zones Board are published in the Code of Federal Regulations at Title 15, Part 400 (15 C.F.R. Part 400), and the regulations of U.S. Customs and Border Protection concerning zones at Title 19, Part 146 (19 C.F.R. Part 146). Information on foreign-trade zones is available on the FTZ Web site at: <http://www.trade.gov/ftz>.

REPORT OF THE EXECUTIVE SECRETARY

During the 2010 fiscal year, the Foreign-Trade Zones (FTZ) Board issued 61 formal orders. The decisions included approvals for one new general-purpose zone and 16 new subzones. Authority was also granted for the expansion of 19 existing general-purpose zones and the reorganization of 14 general-purpose zones under the FTZ Board's alternative site framework (ASF). Other actions involved the granting of authority for revisions to zone plans, three expansions of the scope of manufacturing activity, as well as five approvals for new manufacturing activity in zones.¹

There were 168 FTZ projects fully active during the year, with subzones in operation in more than 112 of them. The number of facilities using subzone status during the year was 263.

The combined value of shipments into general-purpose zones and subzones totaled over \$534 billion, compared with \$430 billion the previous year (Table below and Appendix D). General-purpose sites received nearly \$81 billion in merchandise. Total shipments received at subzone sites amounted to \$453.3 billion. Some 85 percent of zone activity took place at subzone facilities, which is consistent with the pattern of the past 15 years.²

Table 1: Value of Shipments into Foreign-Trade Zones, FY 2009 and FY 2010

Merchandise Received	FY 2009 (\$ billion) ³	FY 2010 (\$ billion) ³
General-purpose zones	75.9	81.0
Subzones	354.7	453.3
<u>Total</u>	<u>430.6</u>	<u>534.3</u>

¹ Appendix A contains a summary of each Board Order. Zone authority for manufacturing/processing activity was granted on a restricted basis in two cases, and activation/time limits were adopted in another fourteen cases. The industries covered by restrictions were oil refining and shipbuilding.

² Appendices B and C contain figures on shipments into and out of general-purpose zones and subzones. Appendix D contains comparative statistics for the past five years. The figures regarding merchandise, employment, products, and other activity in zones represent the latest statistical data available based on reports from zone grantees. Some are still under review. Adjustments normally amount to less than 1 percent of aggregate shipments.

³ The dollar values in this report and appendices are rounded numbers. Calculations were performed before rounding using the complete numbers.

Exports (shipments to foreign countries) from facilities operating under FTZ procedures amounted to over \$34.8 billion (Figure 2). The export figures do not include certain indirect exports involving FTZ merchandise that undergoes further processing in the United States at non-FTZ sites prior to export.

Approximately 320,000 persons were employed at some 2,400 firms that operated under FTZ procedures during the year. The main foreign-origin products received at zones are listed in Appendix E.

The largest industries accounting for zone manufacturing activity include the oil refining, automotive, pharmaceutical, and machinery/equipment sectors. About 58 percent of the shipments received at zones involved domestic status merchandise. The level of domestic status inputs used by FTZ operations indicates that FTZ activity tends to involve domestic operations that combine foreign inputs with significant domestic inputs.

The Board received and filed 77 formal applications during the fiscal year. These proposals requested authority for one new general-purpose zone and 24 subzones, as well as authorization for expansion, reorganization under the ASF, new manufacturing, and other changes at existing zone projects. The FTZ Board's notices on the applications can be found on the FTZ Board's website (www.trade.gov/ftz) under "Online FTZ Information System (OFIS)." In addition, some 105 cases were processed under the Board's less formal administrative procedures (Appendix F). The latter cases involved routine, non-controversial changes to zone projects, such as boundary modifications and scope decisions, as well as cases processed under the temporary/interim manufacturing procedures.

¹ Domestic status merchandise includes both domestic-origin items and foreign-origin items that have been entered for consumption (duty-paid) prior to FTZ admission.

² Export figures are based on material inputs and do not include value added.

³ The number of total FTZ projects is the sum of all projects approved by the FTZ Board, minus those that have lapsed or been terminated.

⁴ Active projects have at least one site (including subzones) in operation.
