

# Summary of International Travel to the United States

MARCH 2016 AND YEAR TO DATE

(revised)

(Based on Country of Residence)

Visitor Arrivals Program (I-94 Data)

U.S. DEPARTMENT OF COMMERCE  
International Trade Administration  
National Travel and Tourism Office  
*Website: <http://travel.trade.gov>*

## **INTRODUCTION**

### **Purpose and Objectives**

The National Travel and Tourism Office (NTTO) is required to effectively provide travel data to public and private industry users. To fulfill this requirement, NTTO produces the *Summary of International Travelers to the United States*. The *Summary* is the official federal government source of reporting international arrivals to the United States. The report defines the size, select characteristics, and travel patterns of inbound international visitor arrivals coming into the United States from world regions and countries based primarily on residency, but also available on country of citizenship. These data are tabulated and published monthly by NTTO. There are no other federal government or private sector sources for these data.

### **Methodology**

This report integrates the volume of inbound international visitors to the United States from residents of other countries, using three U.S. and international government sources: the U.S. Department of Homeland Security (DHS)/U.S. Customs and Border Protection (CBP) I-94 program data, Statistics Canada's International Travel Survey (ITS) and Banco de Mexico travel data.

The count of overseas visitors to the United States is based on DHS/CBP Non-Immigrant I-94 Arrival/Departure Records. On April 30, 2013, Phase 2 of the I-94 Automation project was implemented. Most (approximately two-thirds) of the I-94's were automated in 2010 during Phase 1 of the project with the conversion of the I-94W paper-based document system to an electronic record system together with the implementation of the Electronic System for Travel Authorization (ESTA) program. Citizens of Visa Waiver Program countries were affected by ESTA and the rollout of the 'e-I94W,' specifically for the WB and WT visa types. By April 30, 2013, the remaining I-94 records (approximately one-third), for citizens of countries requiring a visa, were automated in Phase 2.

Beginning in 2014 I-94 arrivals data include a methodology change where the country of citizenship is used as a substitute for those I-94 records with missing country of residence data. Please note that I-94 arrivals data sets are based on the same criteria, including the same visitor types and the 'one night or more' definition of a traveler.

I-94 arrivals monthly data are released initially as 'preliminary,' with these data subject to revisions that may be possible with improved solutions and/or sources discovered. I-94 arrivals monthly data are subject to revisions for up to 36 months following the initial data release.

DHS/CBP provides NTTO's contractor with I-94 program (raw) data monthly. To account for visits (arrivals) to the United States, NTTO only selects I-94 records bearing certain visa types:

**Business:**

B-1 Visa Holders-Business  
WB Visa Waiver-Business  
GB  
GMB Guam Visa Waiver-Business  
I & I1 Visa Holders-Foreign Information Media  
E-1 Visa Holders-Treaty Trader  
E-2 Visa Holders-Treaty Investor

**Pleasure:**

B-2 Visa Holders-Pleasure  
WT Visa Waiver-Pleasure

**Pleasure (continued):**

GT  
GMT Guam Visa Waiver-Tourist  
CPL  
SBP  
CP Country code not equal 584 'Cuba'

**Student:**

M-1 Visa Holders-Vocational Students  
M-2 Visa Holders-Family Members of Vocational Students  
F-1 Visa Holders-Students  
F-2 Visa Holders-Family Members of Students

To comply with globally accepted international tourism definitions and classifications (United Nations World Tourism Organization/UNWTO), a traveler must spend one or more nights in the United States for a period that does not exceed 12 months to be classified a visitor to the United States. The purpose of the trip must be for pleasure, business (i.e., conduct business meetings and consultations, attend conventions and conferences or negotiate contracts) or study. In addition, all visitors are recognized primarily by residency. Visits based on country of citizenship are also provided.

The aggregate count of Mexican visitors to the United States is based on monthly counts from Banco de Mexico which are classified as 'border' travelers (1 + night) and 'tourists.' However, NTTO does use the DHS '1-94 air only' count to determine Mexican air travelers to the United States. The count of Canadian resident travelers to the United States is provided by Statistics Canada's International Visitor Survey. The inbound arrivals from the Survey are reported in the *Summary* but are subject to monthly revisions by Statistics Canada for up to 36 months following the initial data release.

**Visa Waiver Pilot Program (VWPP)/Parolee (April 30-October 30, 2000)**

The Visa Waiver Pilot Program (VWPP) expired at midnight on the evening of April 30, 2000/morning of May 1, 2000. With the statutory expiration of the VWPP, DHS/Office of Immigration Statistics (OIS) began paroling into the United States for up to 90 days, under terms and conditions almost identical to those required under the VWPP, those travelers who otherwise would have been eligible for entry under the VWPP. These measures were undertaken to avoid substantial disruption to international travel and commerce.

A parolee is defined as an alien, appearing to be inadmissible to the inspecting officer (e.g., lack of a valid visa), allowed into the United States for urgent humanitarian reasons or when that alien's entry is determined to be for significant public benefit. Parole does not constitute a formal admission to the United States and confers temporary status only, requiring parolees to leave when the conditions supporting their parole cease to exist. Therefore, parolees are not classified as tourists or visitors for business or pleasure.

On October 30, 2000, the Visa Waiver Permanent Program Act made permanent the Visa Waiver Pilot Program. On October 31, 2000, DHS/OIS resumed admitting visitors for business as WBs and visitors for pleasure as WTs. The permanent program permits nationals from participating countries to apply for admission to the United States for ninety (90) days or less as visitors for business or pleasure without first obtaining a nonimmigrant visa.

### **Non-Tourist Visitor Counts Excluded**

Other "non-tourist" visitor counts reported in DHS 1-94 program data, such as transiting passengers on the way to another country destination, airline crew members, official diplomats, temporary and religious workers, members of the foreign media, press and radio, are excluded from the *Summary* report because they are not by definition considered an international visitor to the United States.

## **REPORT LIMITATIONS**

### **Trend Line Analysis**

Over time, several system changes have occurred to collecting, processing and reporting the visitor arrivals data for the United States. System changes to select data make some elements of this data base incompatible with arrival statistics produced and reported in prior years. When using this report in a time series, the user should pay close attention to past report introductions to assess comparability issues. Years where slight incompatibilities have occurred are discussed below. Unfortunately, there is no way to adjust past data as DHS does not store the raw data for extended periods of time. And there is no way to determine the impact of these changes. Therefore, each year's counts are the best data available at the time it is released. Additionally, many official country designations change over time, which may affect time series analysis.

### **Mexican Arrivals to the United States**

Prior to 2010, the United States only reported monthly Mexican tourist arrivals who visited the U.S. 'interior', beyond the 40 kilometer-25-mile border zone. The source of these data is the I094A semi-automated entry document system in use at U.S. land border ports. Starting in 2010, NTTO reports all Mexican travelers to the United States, monthly, using estimates from Banco de Mexico. Banco counts are subject to periodic revisions. Air travel counts, however, are derived from DHS/CBP 1-94 records.

### **Canadian Arrivals**

Data on Canadian arrivals are derived from Statistics Canada's International Travel Survey. NTTO uses Statistic Canada's data as the official visitor estimates. These data reflect the number of Canadian residents visiting the United States overnight or longer. The Canadian arrival data are subject to monthly revisions by Statistics Canada for up to 36 months following the initial data release. Contact the National Travel and Tourism Office to obtain revised Canadian monthly and total arrivals data.

## **China/Peoples Republic of China (PRC) and Hong Kong**

Starting in 1996, NTTO began reporting China PRC and Hong Kong as one country due to the re-unification. However, NTTO will continue to sub-set Hong Kong if Hong Kong residency data are reported by DHS/CBP. The Hong Kong data should be considered as an estimate in all years subsequent to 1996.

## **Address While in U.S., a/k/a First Intended Address of Non-Resident Arrivals by Country of Residence**

During entry processing, CBP officers ask visitors to the United States to identify the address (number and street), U.S. city and state, they will be visiting while in the country. Currently, DHS/CBP only provides NTTO's contractor with the U.S. state (not city) the traveler is visiting, as indicated in the arrival record. The data are found in the First Intended Address of Non-Resident Arrivals by Country of Residence tables (G.1 and G.2, H .1 and H.2, I.1 and I.2).

While these data can be a useful barometer of the visitor's intention, it is limited to a one destination response. Since the average overseas traveler visits 1.4 U.S. states (in 2013), the I-94 tables will understate the total number of international travelers that visited any given U.S. state. However, based on the Survey of International Air Travelers, another NTTO research program, travelers can indicate up to eight destinations. Therefore, simply using the First Intended Address tables will shortchange the state visitor total. Furthermore, within the First Address data, there are a few records in which no address is provided. This further understates visits to U.S. states.

To develop more accurate estimates of nonresident arrivals to a particular U.S. state, please call the National Travel and Tourism Office at (202) 482-0140 or visit the Inbound section of the National Travel and Tourism Office web site at <http://travel.trade.gov> for state-level visitor estimates. NTTO believes that NTTO's Survey of International Air Travelers program provides the best estimate for total visitation of international travel to the states and cities within the United States.

## **Revisions to 2001 - 2002 I-94 Program Data**

Subsequent to September 11, 2001, DHS eliminated the Transit Without Visa (TWOV) and ITI ('sterile lounge') programs and required all transit travelers to have a visa and to complete the I-94 Form. With the addition of transit travelers to the data base, the arrival counts were being overstated. To provide true arrival totals for visitors to the United States, transit travelers must be removed. NTTO worked with DHS/CBP to obtain the departures data so the transit passengers could be eliminated from the data base. This process was completed for the September-December 2001 data and for all 12 months of the 2002 arrivals data. This same methodology was used in 2003. The data for all these years is comparable to past arrival reports.

## **PROCESSING IMPROVEMENTS**

### ***I-94 Automation Project***

Effective April 30, 2013, DHS/CBP completed Phase 2 of the I-94 Automation project, basically eliminating the paper version of the I-94 Form, as it had done in 2010 for the I-94W, for all travelers at U.S. air and sea ports of entry. With this new technology in place, CBP creates an electronic I-94 Form based on the information in its databases. Visa information has long been made available to CBP by the U.S. Department of State via the Consular Consolidated Database (CCD). Therefore, CBP obtains almost all the information contained on the paper Form I-94 electronically and in advance.

With I-94 Automation, I-94 arrivals data quality is much improved. I-94 Automation greatly reduces data entry errors when compared to manual data entry by Customs and Border Protection (CBP). Prior to Automation, CBP mailed the I-94s from each port of entry to their processing center for manual data entry into a DHS database. This process would create a minimum 5- to 10-day lag time to as much as a 3-month lag from the time the foreign national entered the United States until the arrival record was recorded. Also, Automation markedly improves tracking the identification and tracking of the departure record of foreign national travelers after they exit the United States.

### ***I+ Night Visitor Counts***

I-94 program arrivals data reflect conformity with UNWTO's one-plus night definition of a traveler. An accurate determination of how many nights were spent in the United States has not been possible until the creation of the CBP I-94 Automation project. To account for the number of nights, the 'departure' record must be captured and matched to the arrival document. And in the past, the collection of the departure record was dependent on the rigor of airline gate agents and the ability of each departing visitor to tender their I-94 departure document. Evidence has indicated that a significant number of departure records were not turned in. But with CBP's I-94 Automation project at air and sea ports, it is possible to now be more inclusive of one-night stays given that the arrival-departure record match is now more complete and accurate.

### ***Advance Passenger Information System (APIS)***

Following 9/11, CBP implemented the Advance Passenger Information System (APIS) which collects information on aliens traveling by air or sea to the United States electronically from carriers before arrival.

Currently at CBP's primary inspection station, the officer has access to the APIS passenger information on inbound flights. During the entry process, the arrival record is created from the following: APIS, the integration of U.S. Visit-entry (photograph and fingerprints), data from the visitor's ESTA (VWP citizen) or Department of State visa data, a passport scan, interview results and the visitor signature.

CBP also now uses the Arrival and Departure Information System (ADIS), which draws information from APIS, to document an alien's arrival and departure electronically. Because CBP does not currently collect advance travel information from aliens arriving by land, this automation will not apply to land ports of entry at this time.

### ***Mexican I-94A's***

Mexican and overseas land arrivals are accounted for by I-94A's and I-94/94W's respectively. The Mexican I-94A's are issued electronically. The departure card is given to the traveler to use for re-entry during the 6-month duration of the I-94A. Paper I-94's and I-94W's are still issued to land arrivals, via Mexico and Canada, from overseas.

### **ONLY SOURCE OF ARRIVALS TO THE UNITED STATES**

NTTO provides the only source of arrivals to the United States, primarily by country of residency and by country of citizenship, using the I-94 arrivals data program. This information provides a count of the number of arrivals to the United States each month and is the best source available to determine the number of arrivals to the United States.

### ***Summary of International Travel to the United States Report***

To purchase a subscription to I-94 arrivals data, please complete the order form at <http://travel.trade.gov/research/reports/i94/index.html>.

### ***Web Link & Contact Information***

For information about the monthly I-94 arrivals program, visit the NTTO website at: <http://travel.trade.gov/research/programs/i94/index.html>. If you have questions related to these data, or would like additional information related to this program, please contact NTTO at (202) 492-0140, or e-mail: [ntto@trade.gov](mailto:ntto@trade.gov). Thank you for supporting the NTTO research program. We hope you find these data useful.

**NOTE**

Tables H.1 – H.2 provide data for the following selected countries: France, Germany, Ireland, Italy, Netherlands, Spain, Sweden, Switzerland, United Kingdom, Russia and Hong Kong.

Tables I.1 – I.2 provide data for the following selected countries: India, Japan, South Korea, PRC (excl HK), ROC (Taiwan), Israel, Australia, Argentina, Brazil, Colombia and Venezuela.

Tables L.1 - M.2 provide data for the following selected countries: Austria, Belgium, Denmark, France, Germany, Ireland, Italy, Netherlands, Norway, Spain and Sweden.

Tables N1. - O.2 provide data for the following selected countries: Switzerland, United Kingdom, Poland, Russia, Hong Kong, India, Japan, South Korea, Philippines, PRC (excl HK) and ROC (Taiwan).

Tables P1. - Q.2 provide data for the following selected countries: Singapore, Israel, Saudi Arabia, Turkey, Nigeria, Australia, New Zealand, Argentina, Brazil, Chile and Colombia.

Tables R.1 – S.2 provide data for the following selected countries: Ecuador, Peru, Venezuela, Costa Rica, Guatemala, Honduras, Panama, Bahamas, Dominican Republic, Jamaica, and Trinidad and Tobago.
