

LATITUDE AERO

MISSION

Latitude Aero is committed to improving seating refurbishment and the overall experience for aircraft owners, operators, and service providers through its commitment to 100% on-time delivery and quality acceptance. We will provide a focused set of services synonymous with the same quality and integrity of its Founders. Latitude's employees also strive for growth every day and have a positive impact on our industry, our customers, and our communities. Collectively we provide a world-renowned Customer Experience, second to none, that has firmly established our position as the market leader and subject matter expert in the refurbished seating industry.

BUSINESS DESCRIPTION

We began in 2015 when CEO & Founder Kelvin Boyette recognized an overlooked and underserved segment in the aerospace industry – seating refurbishment. He envisioned a unique business built upon attention to detail and flexible service options to fill that market void. Latitude has established and grown its market share, year over year, due to Kelvin's daily leadership and the long-term vision, support, and guidance from its Board of Directors.

Our primary service offerings include, but are not limited to:

- Turnkey Seat Refurbishment
- Seat Repair & Deep Cleaning
- Seating Redesign & Custom Manufacturing
- Long-Term Contract Maintenance
- IFE and In-Seat Power Upgrades
- Aftermarket Parts Manufacturing

WHY LATITUDE

Latitude is an award-winning FAA and EASA Part 145 Repair Station that, since 2015, has delivered over 60,000 seats with 100% on-time performance and quality acceptance. We have over 25,000 seating part numbers on our Capabilities List, and add new capabilities monthly. As such, we are the well-respected industry leaders in on-time performance and quality, while emerging as the leading subject matter experts in the sector.
