

# Qylur Intelligent Systems

## Company Overview

Based in Silicon Valley, USA, Qylur is a deep-tech company providing comprehensive physical security & defense technologies and solutions, based on its specialty in networks of evolving, cognitive autonomous machines.

Qylur has been recognized as a trail-blazing innovator and designer of advanced security and technology concepts, with its first products deployed at world-renowned sites from mega-event stadiums to amusement parks and museums.

Our core technology includes artificial intelligence, autonomous systems, systems of systems, sensor fusion, IIoT, and advanced data analytics.

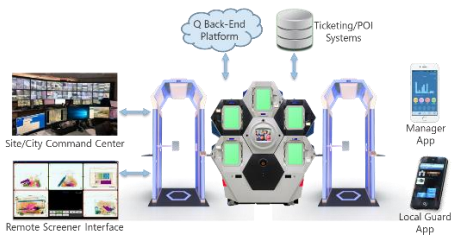

Additional competencies are complex system architecture, complete solution design, customer-specific adaptations, and deep knowledge of security needs and best practices across markets.

We use these technologies and competencies in our suite of end-to-end solutions and services to transform private security and defense as part of cognitive cities and defense forces of the future.

## Core Enabling Products

### The Q

5-chamber AI-powered self-service kiosk for entry security screening and access control

### C4I Console

Control center console for city-wide situation awareness and intervention

### SNIM AI®

Advanced AI model fine-grain customization for optimizing operational deployments

## Comprehensive Solutions

### Q Sentinel

End-to-end entry security and operations streamlining and optimization solution

### EAGLE AI

City-wide security suite of C4-connected, AI-powered security screening solutions

## Services

- Concept and Design
- Custom Solution Design
- Engineering
- Installation
- Maintenance
- Certification and Training
- Optimization
- Analytics
