- 600-kW farm owned / operated by ATCO

# ESG COMMITMENT – 2030 TARGETS

## Supporting the energy transition and reducing GHG emissions

Reducing net operational GHG emissions to earnings intensity by 30%

Reducing our customers' GHG emissions by 2 million tonnes through renewable energy, cleaner fuels, energy infrastructure and storage.

Owning, developing or managing over 1,000-megawatts of renewable energy

Deriving 20% of revenues from transitional product categories (e.g. renewable natural gas and hydrogen).

## Promoting inclusive growth in our workforce and communities

Increasing net economic benefits to our Indigenous partners by 40%.

Achieving and maintaining a minimum of 30% female representation at the Board of Directors and senior leadership levels.

Achieving and maintaining a minimum of 25% minority representation within the ATCO Group workforce.

Maintaining leading health and safety practices and performance.

# VALUE TO NORAD MODERNIZATION

ATCO Expertise and Assets in Green Energy

Build of Northern Infrastructure

Facility Management of Northern Infrastructure

In-Service Support of Northern Radars and Communications

Longstanding Inuit and Indigenous Partnerships
