Additional information regarding the Government of Bahrain's April 1, 2009 Submission regarding "The designation of yarns that are not commercially available for certain bedding, curtains, bed covers, and pillow covers that are made from fine compact ring spun yarns"

1. Bahrain has identified the chapter 63 products, by HTS number, for which we propose to modify the rules of origin. The request is made for single yarns and not for plied yarns. As a result, such yarns would be classified under HTSUS 5205.27.0020 and 5205.28.0020
2. The subject yarns are those measuring English 60's or finer (greater than 102 metric). All other references to yarn size are stated in English measurements.
3. There is a typographical error in footnote 1 of the attachment to the original submission which cites 150's or fine gauge (metric) as equivalent to 60's or fine gauge (English). The 150 is incorrect. The correct figure is 102 metric.
