Steel Exports Report: Italy

Background

Italy is the world’s seventh-largest steel exporter. In year to date 2017 (through June), further referred to as YTD 2017, Italy exported 8.8 million metric tons of steel, a 0.4 percent increase from 8.77 million metric tons in YTD 2016. Italy’s exports represented about 4 percent of all steel exported globally in 2016. The volume of Italy’s 2016 steel exports was slightly larger than that of Belgium, and just under one-sixth the size of the largest exporter, China. In value terms, steel represented just 6 percent of the total amount of goods Italy exported in 2016.

Italy exports steel to more than 170 countries and territories. The 14 countries labeled in the map below represent the top markets for Italy’s exports of steel, receiving more than 400 thousand metric tons each and accounting for 80 percent of Italy’s steel exports in 2016.

Quick Facts:

- World’s seventh-largest steel exporter: 8.8 million metric tons (YTD 2017)
- 47% growth in steel exports since Q1 2009
- YTD export volume up 0.4% while export value up 15%
- Top three markets: Germany, France, Spain
- Largest producers: ILVA SpA, Marcegaglia
- Exports as a share of production at 71.2% in YTD 2017
- 3 trade remedies in effect involving steel mill imports from Italy; 6 trade remedies in effect involving steel mill imports from the European Union

Steel Exports Report: **Italy**

**Steel Trade Balance**

Over the past decade, Italy’s imports and exports have displayed roughly similar trends: both saw increases between 2005 and 2007, declined significantly in 2009, and recovered gradually over the next six years. Between Q1 2009 and Q2 2017, exports grew 47 percent while imports grew 62 percent.

Apart from surplus periods in 2009 and 2012-2014 when Italy was a net steel exporter, Italy has maintained a steel trade deficit since 2005. In YTD 2017, the steel trade deficit stood at −1.6 million metric tons, up from −1.5 million metric tons in YTD 2016.

**Export Volume, Value, and Product**

Italy’s steel exports increased by 1.4 million metric tons to 17.2 million metric tons in 2016 — an increase of 9 percent from 2015. In YTD 2017, exports increased 0.4 percent from YTD 2016 to a total of 8.8 million metric tons. In value terms, Italy’s steel exports decreased by 1 percent between 2015 and 2016. In YTD 2017, export value has increased 15 percent to $8.5 billion from $7.4 billion in YTD 2016.

Flat products accounted for 39 percent of Italy’s steel exports by volume at 3.5 million metric tons in YTD 2017. Long products accounted for 31 percent, or 2.7 million metric tons, of Italy’s exports of steel, followed by pipe and tube at 17 percent (1.5 million metric tons), stainless steel at 9 percent (772 thousand metric tons), and semi-finished steel at 4 percent (351 thousand metric tons).
Steel Exports Report: Italy

Exports by Top Market

At 6.1 million metric tons (mmt), Italy’s exports to its top 10 steel markets represented 70 percent of its steel export volume in YTD 2017. Germany was the largest market for Italy’s exports with 24 percent (2.1 mmt), followed by France at 12 percent (1 mmt), Spain at 7 percent (0.64 mmt), Austria at 6 percent (0.48 mmt), and Poland at 5 percent (0.44 mmt).

The United States ranked 10th as a destination for Italy’s steel exports in YTD 2017 at 3 percent (256 thousand metric tons) — an increase of 61 percent from 159 thousand metric tons in YTD 2016.

Trends in Exports to Top Markets

Between YTD 2016 and YTD 2017, exports to Italy’s top 10 markets increased in volume to nine of the top 10 export markets. Only exports to Turkey decreased, down 17 percent by volume. Export volumes increased the most to the United States (up 61% from YTD 2016), Poland (up 26%), Czech Republic (up 23%), Switzerland (up 20%), and Germany (up 15%).

Outside the top 10 markets, other notable volume changes included Italy’s exports to the 27th-ranked Cyprus (up 157%), 30th-ranked Lebanon (up 228%), and 32nd ranked Saudi Arabia (up 173%).

Similar to volume increases, the overall value of Italy’s exports increased to nine of its top 10 markets. Export values to the United States again showed the largest increase (up 53% from YTD 2016), followed by Poland (up 40%), the Czech Republic (up 32%), and Germany (up 27%). The only decline in YTD 2017 export values was to Turkey, down 6 percent from YTD 2016.
Steel Exports Report: Italy

Top Markets by Steel Product Category

In YTD 2017, Italy’s top export market by volume was Germany for every product category. Germany accounted for 26 percent of Italy’s exports of flat products (897 thousand metric tons), 21 percent of long product exports (573 thousand metric tons), 21 percent of pipe and tube product exports (307 thousand metric tons), 35 percent of semi-finished exports (124 thousand metric tons), and 23 percent of stainless steel exports (178 thousand metric tons).

France was the second-largest market for Italy’s exports of flat products (11% or 392 thousand metric tons), long products (11% or 306 thousand metric tons), and pipe and tube products (16% or 242 thousand metric tons) in YTD 2017.

The United states was a top-five export destination for pipe and tube, semi-finished, and stainless steel products. Receiving 5% (71 thousand metric tons), 5% (18 thousand metric tons), and 7% (54 thousand metric tons) respectively.

**Italy’s Import Market Share in Top Destinations**

In 2016, the import market share for Italy’s steel products increased in the majority of Italy’s top export destinations. The share of imports from Italy in Switzerland showed the largest increase (up 2.5 percentage points) in 2016, followed by Germany (up 1.4 percentage points) and Slovenia (up 1.3 percentage points). Italy’s import share in France, Algeria, Spain, and the Czech Republic increased by less than one percentage point. In 2016, import shares from Italy in Poland and Turkey decreased by less than half of one percentage point, while the import share from Italy in Austria remained the same.

Among Italy’s top export markets, Algeria, Switzerland, and Slovenia each received more than a quarter of their steel imports from Italy in 2016. Long products accounted for the largest share of steel imports from Italy in both Algeria at 94 percent (1.4 million metric tons) and Switzerland at 51 percent (335 thousand metric tons). Half of Slovenia’s imports from Italy in 2016 were of flat products (224 thousand metric tons).

---

**Steel Import Composition of Top Market-Share Countries - 2016**

- **Algeria**: Long (94%), Flat (6%), Pipe & Tube (3%), Stainless (7%), Semi-finished (3%).
- **Switzerland**: Long (51%), Flat (4%), Pipe & Tube (3%), Stainless (7%), Semi-finished (3%).
- **Slovenia**: Flat (42%), Long (22%), Pipe & Tube (17%), Stainless (8%), Semi-finished (9%).

Steel Exports Report: Italy

Overall Production and Export Share of Production

Itay's crude steel production increased by 45 percent between 2009 and 2011 before falling by 23 percent to 2015. Production in YTD 2017 increased by 2 percent to 12.4 million metric tons in YTD 2016. While apparent consumption (a measure of steel demand) kept up with production for much of 2009-2014, it outpaced production by 4 million metric tons in 2015 and 2.4 million metric tons in 2016. In YTD 2017, the gap between production and apparent consumption increased to 1.6 million metric tons from 1.5 million metric tons in YTD 2016. Italy’s steel exports as a share of production grew 12 percentage points between 2009 and 2016. The export share of production stood at 71.2 percent in YTD 2017, down 1 percentage point from YTD 2016.

Top Producers

Unlike much of Europe, steel production in Italy is diffused across many small- and medium-sized companies. After privatization of the country’s steel industry in the late 1980s and 1990s, only a small number of the earlier, larger steelworks remain.

**Trade Remedies in the Steel Sector**

Antidumping duties (AD), countervailing duties (CVD), associated suspension agreements, and safeguards are often referred to collectively as trade remedies. These are internationally agreed upon mechanisms to address the market-distorting effects of unfair trade, or serious injury or threat of serious injury caused by a surge in imports. Unlike anti-dumping and countervailing measures, safeguards do not require a finding of an “unfair” practice. Before applying these duties or measures, countries investigate allegations and can remedy or provide relief for the injury caused to a domestic industry. The tables below provide statistics on the current number of trade remedies various countries have against steel mill products from Italy and from the European Union, which includes Italy.

Steel Exports Report: Glossary

**Apparent Consumption:** Domestic crude steel production plus steel imports minus steel exports. Shipment data are not available for all countries, therefore crude steel production is used as a proxy.

**Export Market:** Destination of a country’s exports.

**Flat Products:** Produced by rolling semi-finished steel through varying sets of rolls. Includes sheets, strips, and plates. Used most often in the automotive, tubing, appliance, and machinery manufacturing sectors.

**Import Penetration:** Ratio of imports to apparent consumption.

**Import Source:** Source of a country’s imports.

**Long Products:** Steel products that fall outside the flat products category. Includes bars, rails, rods, and beams. Used in many sectors but most commonly in construction.

**Pipe and Tube Products:** Either seamless or welded pipe and tube products. Used in many sectors but most commonly in construction and energy sectors.

**Semi-finished Products:** The initial, intermediate solid forms of molten steel, to be re-heated and further forged, rolled, shaped, or otherwise worked into finished steel products. Includes blooms, billets, slabs, ingots, and steel for castings.

**Stainless Products:** Steel products containing at minimum 10.5% chromium (Cr) offering better corrosion resistance than regular steel.

**Steel Mill Products:** Carbon, alloy, or stainless steel produced by either a basic oxygen furnace or an electric arc furnace. Includes semi-finished steel products and finished steel products. For trade data purposes, steel mill products are defined at the Harmonized System (HS) 6-digit level as: 720610 through 721650, 721699 through 730110, 730210, 730240 through 730290, and 730410 through 730690. The following discontinued HTS codes have been included for purposes of reporting historical data (prior to 2007): 722520, 722693, 722694, 722910, 730410, 730421, 730610, 730620, and 730660.

**Global Steel Trade Monitor:** The monitor provides global import and export trends for the top countries trading in steel products. The current reports expand upon the early release information already provided by the Steel Import Monitoring and Analysis (SIMA) system that collects and publishes data on U.S. imports of steel mill products. Complementing the SIMA data, these reports provide objective and current global steel industry information about the top countries that play an essential role in the global steel trade. Information in these reports includes global exports and import trends, production and consumption data and, where available, information regarding trade remedy actions taken on steel products. The reports will be updated quarterly.

**Steel Import Monitoring and Analysis (SIMA) System:** The Department of Commerce uses a steel import licensing program to collect and publish aggregate data on near real-time steel mill imports into the United States. SIMA incorporates information collected from steel license applications with publicly released data from the U.S. Census Bureau. By design, this information provides stakeholders with valuable information on the steel trade with the United States. For more information about SIMA, please go to http://enforcement.trade.gov/steel/license/.
